REACT CONF 2017

Watching the livestream was almost as good as the real thing…, almost! https://www.youtube.com/watch?v=7HSd1sk07uU&list=PLb0IAmt7-GS3fZ46IGFirdqKTIxlws7e0&index=1

React Native Navigation from AirBnB - https://github.com/airbnb/native-navigation - https://youtu.be/tWitQoPgs8w?list=PLb0IAmt7-GS3fZ46IGFirdqKTIxlws7e0

Wix and Tal Kol talk on 60fps cross native platform is pretty awesome - https://github.com/airbnb/native-navigation - https://youtu.be/mjsv8NJnt5k?list=PLb0IAmt7-GS3fZ46IGFirdqKTIxlws7e0

Adam Perry's talk on create-react-native-app was pretty solid - https://github.com/react-community/create-react-native-app - https://youtu.be/9baaVjGdBqs?list=PLb0IAmt7-GS3fZ46IGFirdqKTIxlws7e0

Michaela Lehr and React VR - https://youtu.be/CtVo3z_o9Rw?list=PLb0IAmt7-GS3fZ46IGFirdqKTIxlws7e0

Neehar Venugopal and code splitting - https://youtu.be/bb6RCrDaxhw?list=PLb0IAmt7-GS3fZ46IGFirdqKTIxlws7e0

PRETTIER

Its time to do it!

Getting the best of both world - Code ➡️ prettier ➡️ eslint --fix ➡️ Formatted Code ✨

Using prettier-eslint-cli - https://github.com/prettier/prettier-eslint-cli

add a script to your package.json and boom

```
{
  "scripts": {
    "format": "prettier-eslint --write \"src/**/*.js\""
  }
}
```

for more reference on pesky semicolons check this out - https://github.com/prettier/prettier/issues/12

BABEL

Some fun times with babel-preset-env

https://github.com/babel/babel-preset-env

```
{
  "presets": [
    ["env", {
      "targets": {
        "browsers": ["last 2 versions", "safari >= 7"]
      }
    }]
  ]
}
```

FLOW

v0.42.0 - Another non-breaking breaking release

Likely to cause new Flow errors:

New Features:

Object type spread (type TypeB = { ...TypeA };). You can now spread one object type into another! It is designed to mimic the behavior of spreading an object value in an object initializer, where only own properties are copied over.

Experimental new flow ide command, through which an IDE can establish a permanent connection with Flow. The IDE can send commands through this connection and Flow can push changes to the IDE.
